PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience in building web applications using React, Node.js, Express, and PostgreSQL. Developed projects including a Note-taking API, Movie watchlist app, and an Airbnb-like platform. Strong understanding of REST APIs, authentication, and database design. Seeking an opportunity to apply and grow backend and frontend development skills.

TECHNICAL SKILLS

Languages: JavaScript

Frontend: React.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js

Database: PostgreSQL

Tools: Git, GitHub, Postman

Concepts: REST API, Authentication, CRUD Operations, MVC Architecture

PROJECTS

Note API (Backend Project) || [Github](#)

Tech: Node.js, Express.js, PostgreSQL

- Built RESTful API for note management with CRUD functionality
- Implemented user authentication using JWT
- Designed relational database schema using PostgreSQL
- Tested endpoints using Postman

Movie Watchlist Web App(Backend Project) || [Github](#)

Tech: Node.js, Express.js, PostgreSQL

- Integrated backend APIs for managing watchlist data
- Implemented add/remove functionality
- Implemented watchlist functionality

Airbnb Clone (Full Stack Project)

Tech: MongoDB, Express.js, React.js, Node.js

- Built full-stack rental platform with property listing features
- Implemented user authentication and protected routes
- Designed MongoDB schema for users and listings
- Developed responsive UI using React

EDUCATION

Bachelor in Computer Engineer (running)

National Academy of Science and Technology, Kailali

Minor Project: Task Management Tool - Full Stack application for managing

Task with admin dashboard built using reactjs for frontend and python with flask

for the backend. [Github](#)
